

Tutorial Exercise 8

UML Structure Diagrams: Assessment project

1. Produce some UML Structure Diagrams
 - a. *Class*,
 - b. *Component* or
 - c. *Deployment* diagram

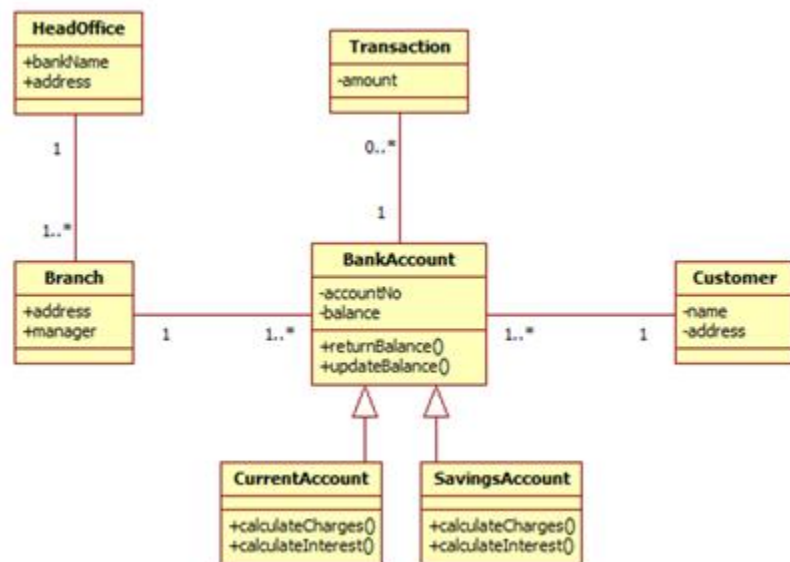

for the system you are developing for your project, if you think they are relevant and could help with the understanding of the system.

2. Have a general discussion on which UML diagrams would be particularly appropriate for communicating the structure of the system for your project.

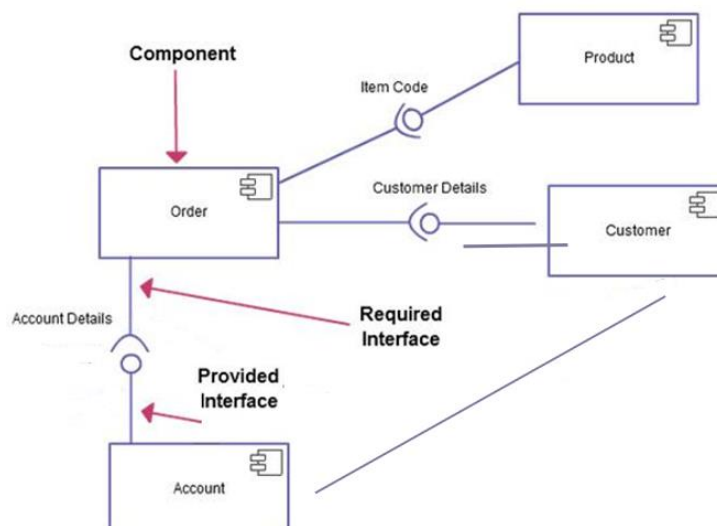

Class Diagram Example

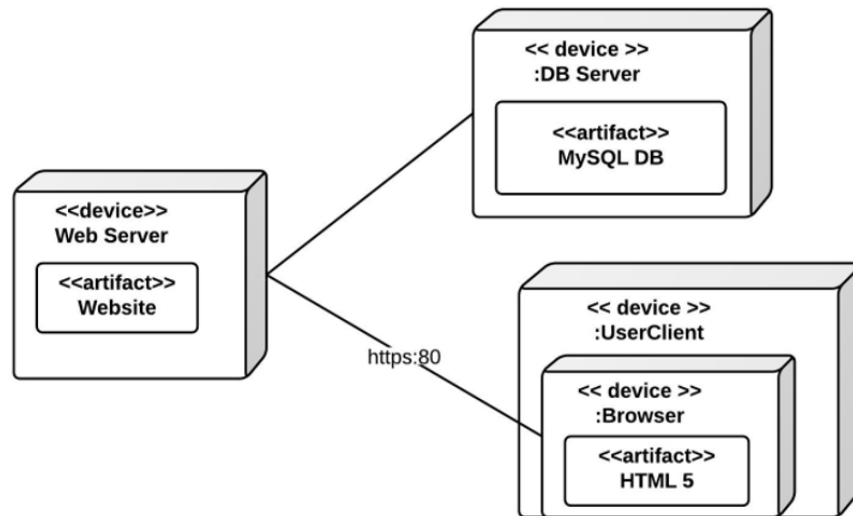

Banking Class Diagram

Component Diagram Example

Deployment Diagram Example

For creating your diagrams, you can use:
