

Software Engineering Workshop

Task 1 - Read the article “No Silver Bullet-Essence and Accident in Software Engineering” by Frederick P. Brooks.

1. Critically analyze the article and understand the issues for design and development of a complex software system
2. The article was published in 1986; analyze the essential difficulties in the software development process explained in the article. What is your opinion about these difficulties nowadays?
3. How much do you know software engineering has advanced considering the tools and technologies?

Task 2 - Tools and Technologies

Go through the Learning Git and GitHub course on LinkedIn learning for understanding the source code version control systems. Here is the link to the course.
