

Hey students, let's dive into PHP—a powerful language used to build dynamic websites. PHP, which stands for Hypertext Preprocessor, lets you mix code with HTML to create pages that can interact with users, work with databases, and much more. It's a great tool for bringing your web ideas to life!

To get hands-on practice, check out learn.php.org. This interactive site turns learning PHP into a game-like experience where you can write and run code right in your browser. It's an excellent resource for beginners, so don't hesitate to experiment and see what you can create. Happy coding!
