

Tutorial Exercise 7

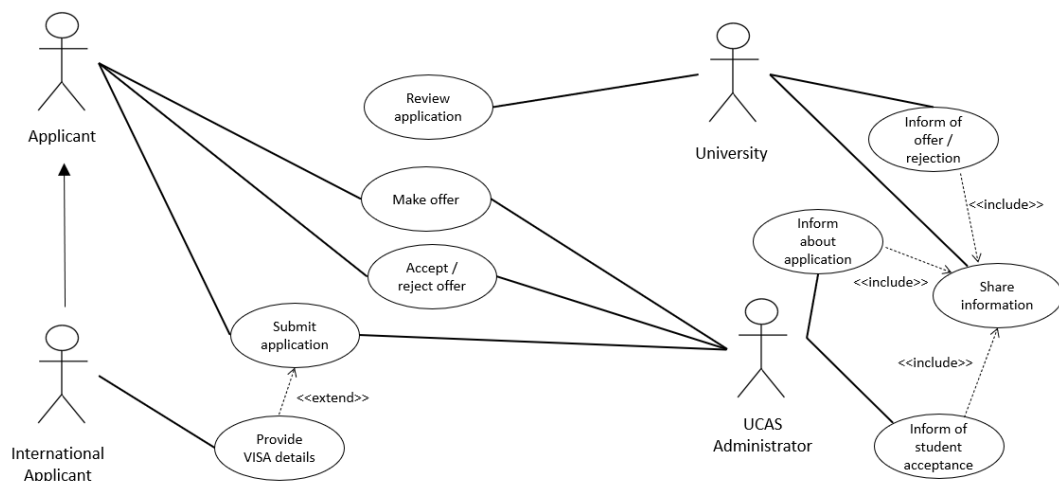

UML Behaviour Diagrams: Assessment project

1. Produce some UML Behaviour Diagrams - at least the
 - a. *Use Case*,
 - b. *State Machine* and
 - c. *Activity* diagrams

for the system you are developing for your project.

2. Produce some extra UML *Sequence* and *Communication* diagrams for the system you are developing, if you think they are relevant and could help with the team's understanding of the system.
3. Have a general discussion on which UML diagrams would be particularly appropriate for communicating the structure of the system for your project.

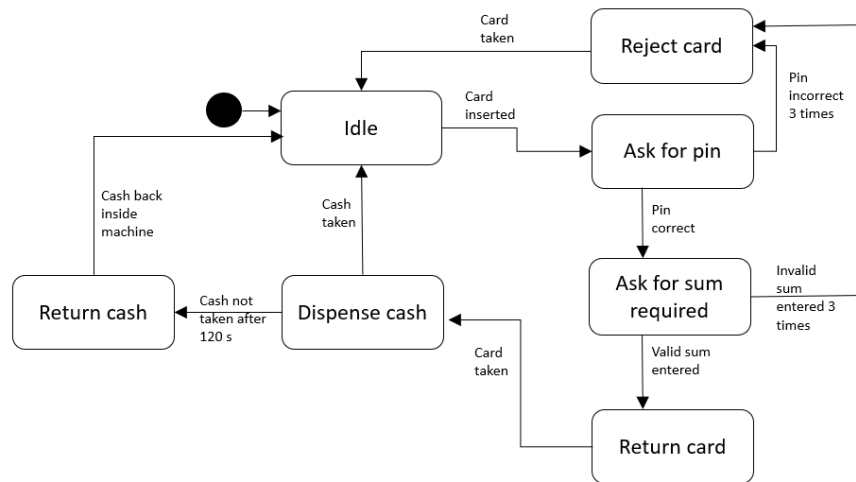

UCAS Use Case Diagram

State Machine Diagram Example

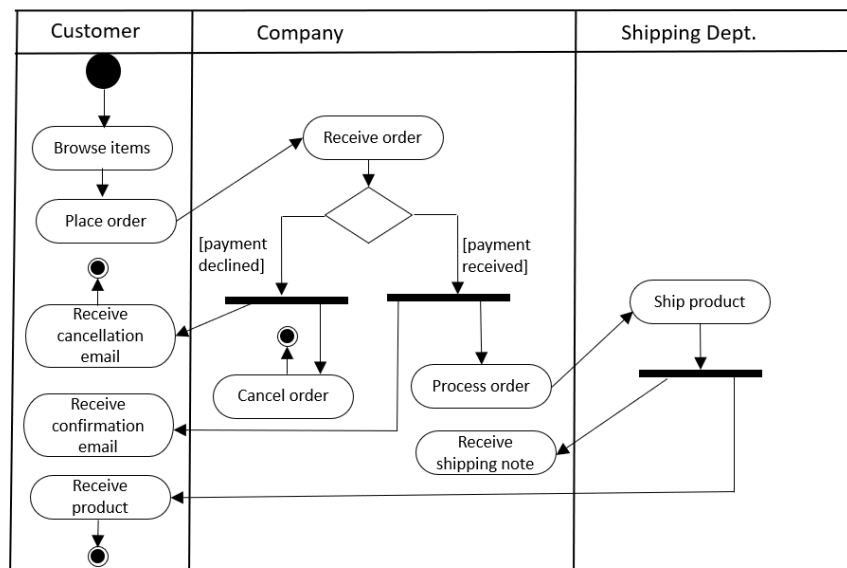

ATM Machine

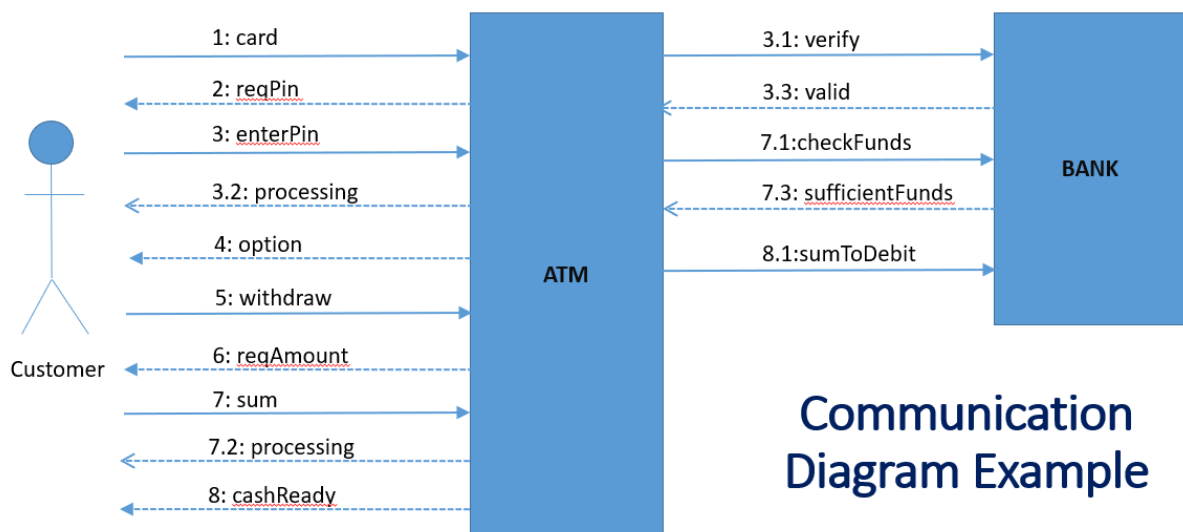

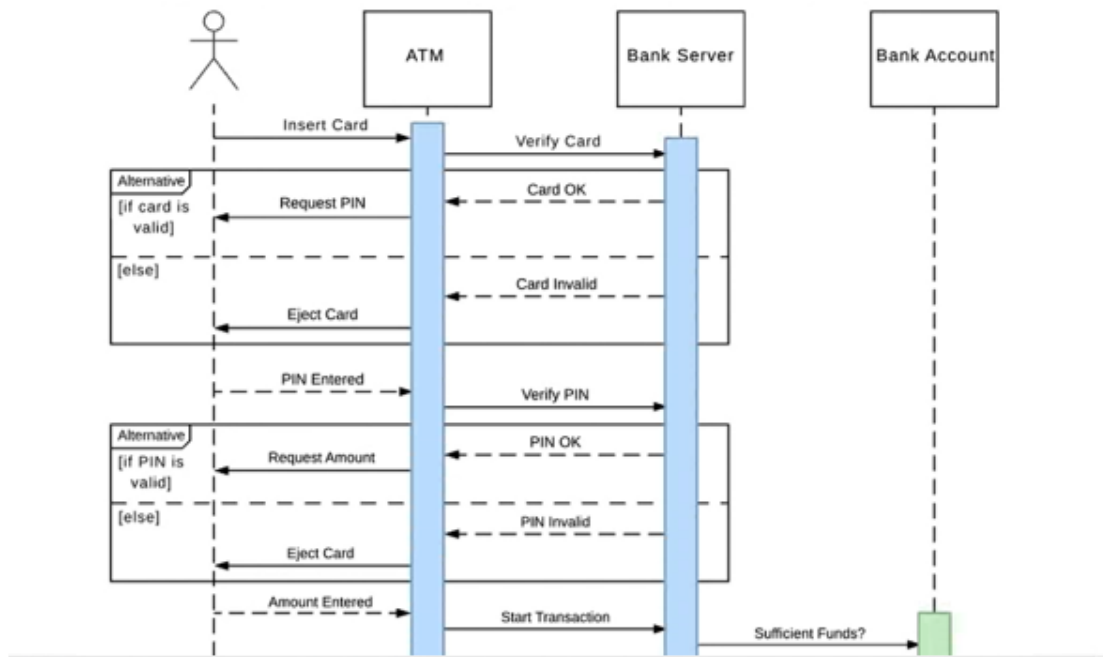

Activity Diagram Example

Placing an order

Sequence Diagram Example

For creating your diagrams, you can use:
