

In today's lecture, we covered the material from the following Jupyter Notebook:

 Teach-Python Repository

<https://github.com/giannis00/Teach-python>

Please make sure you go through the examples we discussed and try to run the code yourselves.

For additional practice and to review the basics of Python (syntax, variables, data types, etc.), you can use the following online resource:

 W3Schools – Python Tutorial

<https://www.w3schools.com/python/>
